

Environmental Wood Supply

WOOD DELIVERY

PRE-APPROVAL FOR WOOD DELIVERY

Haulers must be approved prior to wood delivery to Environmental Wood Supply. To get approval, please contact the office at 651-772-4490.

SERVICES

Environmental Wood Supply helps cities, counties, and contractors manage clean wood waste. Clean wood waste may come from:

- Storm damage
- Emerald ash borer (EAB) infestation
- Tree trimming
- Habitat restoration
- Low-grade wood byproduct from processing
- Land clearing

See the list of acceptable items below.

The clean wood is chipped and used as biomass fuel for the combined heat and power facility in downtown Saint Paul that supplies waste heat to District Energy St. Paul and generates renewable electricity for the local utility.

REQUIREMENTS

All persons visiting the Environmental Wood Supply site are required to drive under 5 miles per hour, follow posted site safety rules, and wear protective gear including high-visibility shirt or vest, work boots, and where designated, safety glasses and a hard hat.
